Dear Friends and Colleagues,

Allow me, at the very beginning of this address, to express my sincere gratitude for your longstanding support of the Association of Anesthesiologists and Intensivists of Serbia. Your support has meant a great deal to us, as without it our decades-long efforts in promoting anesthesiology and intensive care medicine would have been far less visible and impactful.

The Association of Anesthesiologists and Intensivists of Serbia (UAIS) is the leading professional association of anesthesiologists and intensivists in Serbia, continuing the tradition of the former Association of Anesthesiologists of Yugoslavia. Today, UAIS brings together nearly one thousand anesthesiologists from across Serbia. As a non-profit professional organization, for decades we have remained committed to promoting our profession within the wider social context, while also focusing on educational activities and continuous professional development.

Particularly over the last decade, UAIS has grown into a highly respected association and an important partner to leading international professional organizations in the fields of anesthesiology, intensive care medicine, and pain management.

It is with great pleasure and enthusiasm that, in my capacity as President of UAIS, I invite you to join us at the 15th Jubilee Congress of Anesthesiologists and Intensivists of Serbia with significant international participation.

The captivating capital of Serbia, especially beautiful at the beginning of autumn, will welcome us at the magnificent Sava Centar, where more than one hundred distinguished speakers from Serbia and abroad will take part in a comprehensive scientific programme. Through twenty plenary sessions, numerous pre-congress courses, and practical workshops, more than one thousand participants from Serbia and the region will have the opportunity to engage with the latest trends and advancements in our profession.

I warmly invite you to once again be our trusted partner during this first October weekend and support us in achieving the ambitious goals we have set.

At the same time, we encourage you to take advantage of the opportunity to become part of our industry-friendly exhibition area, which this year will extend across an impressive 1,200 square metres. The main congress hall will serve as a meeting point for science, medicine, and industry — a space where, through industry symposia and presentations, you will be able to introduce congress participants to your business portfolio and showcase the latest innovations resulting from years of investment and research within your companies.

The official organizational partner of the congress is once again Easy Travel & Events, which has prepared attractive congress packages and full logistical support for all participants and partners. We look forward to meeting you again and continuing our successful cooperation.

Please *Save the Date* and remember to reserve October 2nd and 3rd in your business calendars. We look forward to welcoming you to Belgrade!

Prof. Dr. Radmilo Janković
President of the Association of Anesthesiologists and Intensivists of Serbia
